CGPA: 8.34

PROJECTS

Portfolio — Self Portfolio

I built a personal portfolio website to showcase my coding skill, academic background and technical projects and skills in one place. This website features all my projects and skills which are linked directly to Github while a dedicated page for that skill. It is also a direct link to download my latest resume. It serves as a digital home for my work making it easy for recruiters and peers to see what I can build.

Tech Stack: HTML5, CSS3, JAVASCRIPT, GIT, GITHUB, FIREBASE(AUTHENTICATION), NETLIFY.

StudySquare — Unofficial College Student Portal

StudySquare is an unofficial college web portal developed to streamline campus communication and academic resource sharing. The platform features an integrated digital repository for past question papers and curriculums alongside a real time announcement dashboard to keep the students community informed about upcoming Campus events and academic updates.

Tech Stack: HTML5, CSS3, JAVASCRIPT, EXCEL, NETLIFY.
